OSI Has Made Configuring Stereomicroscope Stands as Simple as Three Clicks.

With almost 200 standard configurations of stereomicroscope stands, the microscope team at OSI has made it easy for anyone to find the perfect solution for their application.

By selecting a Base, Column, and Arm, in any order, the user is shown compatible component choices and corresponding product sheets in real time. Clicking on any product sheet enlarges it for previewing, while clicking on the green button downloads a full-size pdf.

Ted Altshuler, Tom Wynne, Rod Steffen, and Mike Pinchback have all contributed to the project, making the Configurator

comprehensive yet quick and easy to use. The resulting Microscopy product sheets provide complete component descriptions and high-quality 3D renderings.

While OSI is always available for consultation, the new Configurator tool empowers customers with information at their fingertips. Get creative, explore new options, and configure your microscope stand with hand-selected components you have chosen yourself!

MICROSCOPY

OSI is America's leading maker of stereomicroscope stands, componentry, and custom accessories, serving science and industry throughout the Western Hemisphere. 132 Miller Drive, Dacono CO 80514, 303 828 9093, info@osi-incorp.com
